General Practice access to hospital patient information

Phil Brimacombe
Chief Information Officer
Counties Manukau DHB
Waitemata DHB
healthAlliance

Counties Manukau DHB GP Health Intranet

- PMS access to Concerto clinical workstation
- 21 out of 98 practices
- Lab test results
- Clinical documents
- Patient activity
- Surgical notes
- Radiology reports
- Medicine information
- DHB services & policies

The screenshot shows a Microsoft Internet Explorer browser window titled "Health Intranet - Microsoft Internet Explorer". The address bar contains "http://www.healthintranet.govt.nz". The page features a green header with a plus sign icon and the text "Health Intranet". Below the header is a navigation menu with buttons for "Home", "Help", "HI Connections", "External Links", and "FAQ". The main content area has a blue heading "Welcome to the Health Intranet" followed by two paragraphs of text and a small image of a hand holding a glass. The first paragraph explains the purpose of the Health Intranet of New Zealand (HINZ) as a secure communication and information sharing platform. The second paragraph describes it as an emerging knowledge network. The third paragraph mentions the role of Telecom in supporting the intranet.

This screenshot shows the "Hi Connections" page of the Health Intranet. It features the same green header and navigation menu as the previous page. The main heading is "Hi Connections". Below this, there are four rows of content, each with a logo on the left and a link on the right:

- East Health Web Site**: Accompanied by a logo of a stylized building.
- NHI Access**: Accompanied by the "nzhis" logo and the text "New Zealand Health Information Service". A sub-link "NHI Access for use with HealthLink Digital Certificates" is also present.
- Counties Manukau DHB**: Accompanied by the "COUNTIES MANUKAU DISTRICT HEALTH BOARD" logo.
- Baxter HOMES**: Accompanied by the "Baxter" logo.
- Novartis**: Accompanied by the "CareLink" logo, which includes the text "CLOZARIL (clozapine)".

Medication Leaflet Library

The Medication Leaflet Library is a tool to help educate patients how to best use their medication.

Patients should give consent to receive the information and content of the leaflets should be discussed with them to assess their understanding. Before searching on the Drug or Trade name, follow the pathway in the [Counselling Guide](#)

[Back to Medicines Information Site](#)

If information is not available regarding a specific drug, please contact the Medicines Information Service on extension 8257

Or click here to see the [Consumer Medicine Information](#) leaflets provided by Medsafe. (Listed in Trade name order only).

Search by the first letter -

Drug Name	Trade Name
A B C D E F G H I J K L M	3 A B C D E F G H I J K L M
N O P Q R S T U V W X Y Z	N O P Q R S T U V W X Y Z

OR search by the full Drug or Trade name below -

Type in the full name of Drug or Trade Name
OR first 4 letters followed by * (e.g. warf*)

[Tips for searching](#)

[Tikanga Best Practice Draft Policy](#)

Counties Manukau District Health Board, together with Mana Whenua*, has begun to work to develop a Tikanga Best Practice Policy for the DHB and related PHOs. This will underpin the development of a Tikanga Best Practice staff training programme.

The policy aims to:

1. empower patients, whanau and community, enabling them to take a more proactive and effective role in their health outcomes for Maori at individual, whanau and community level;
2. empower staff by improving their cultural knowledge when working with patients,

Welcome to the General Practice website

We endeavour to include pertinent and up to date information which includes:

- The General Practice Newsletters
- Copies of the "Faxes" we send out
- Waiting times for elective services
- CME dates and dates of other meetings we know about
- Referral templates, guidelines and other "forms"
- Links to other health websites

To receive our "fax outs" and the newsletters by email, please click on the [Feedback Form](#) and complete the form with your details.

Any suggestions on further content that may be useful are very welcome. Contributions from practices, GP's, nurses, general practice organisations, PHO's, etc. are very welcome.

Please send all suggestions or contributions to Dr Tom Bracken by e-mail tbracken@middlemore.co.nz, or post to:

Primary Health Organisations (PHO)

What is a Primary Health Organisation (PHO)?

A PHO is a new way of arranging health care in the community to make sure people get the first level health care they need. It's a group of health providers whose job it is to look after all the people enrolled with them. A PHO is a team of doctors, nurses and other health professionals (such as Māori health workers and health promotion workers) who are working with your community to give you and your family a better health service.

Already, most New Zealand general practices are part of a PHO. Ask your doctor or nurse if they are part of a PHO or if they are planning to join a PHO.

PHOs will give communities, iwi and enrolled people the opportunity to have their say about the services PHOs provide.

PHOs get a set amount of funding from the government to subsidise a range of health services. The funding is based on the numbers and characteristics (e.g. age, sex, ethnicity) of people enrolled with them. That funding pays for:

- providing care and treatment when people are ill
- helping people stay healthy
- reaching out to those groups in their community who have poor health or who are missing out on primary health care.

Over time, the government is increasing funding to PHOs with the aim of reducing the cost of primary health care for everyone.

SURVEY
Calling Māori health students!

Closing date for completion of the survey is 15 January 06.

Nau mai haere mai kia tautokohia tenei rangahau mō tātou te iwi Māori

The Māori Health Research Centre, Auckland University of Technology are currently undertaking research funded by the Ministry of Health looking at participation and retention issues within the Māori health and disability workforce. The project is led by Associate Professor Mihi Ratima, and aims to improve support for Māori health students.

Part of that research is to survey Māori students like you that are undertaking study within health science related programmes. These programmes must be level five and above and could include the following:

Nursing	Community client care
Social work	Pharmacy
Counselling	Obstetrics and gynaecology

You are invited to provide feedback on the following DRAFT documents:

- [DRAFT Disability Strategy Action Plan](#) by 9 December 2005
- [DRAFT Health of Older People Action Plan](#) by 19 December 2005

Patients have better access to information with Healthpoint

Patients attending Counties Manukau District Health Board's hospitals will now be armed with more information, with the launch of an innovative new website.

www.healthpoint.co.nz is a free, easy to use website providing answers to many of the questions patients may have about what to expect when referred to a specialist or hospital; information such as treatments and procedures, waiting times, parking, transport, links to support groups and information on consultants who work in each service.

To coincide with CHNED the new Healthpoint website will provide all this

Let's Beat Diabetes aim:
“ To prevent or delay the onset of Type 2 Diabetes (diabetes), slow disease progression, and improve the quality of life for people with diabetes in Counties Manukau. ”

[letsbeatdiabetes.org.nz](#) | Home

Home

Let's Beat Diabetes (LBD) is a catalyst for enhanced intersectoral collaboration, community partnerships and action, health innovation and social action aimed at "beating diabetes" in Counties Manukau.

LBD: A Five Year Plan to Prevent and Manage Type 2 Diabetes in Counties Manukau is a five year, district-wide plan aimed at long-term, sustainable change to prevent or delay the onset of Type 2 Diabetes ("diabetes"), slow disease progression and increase the quality of life for people with the diabetes in Counties Manukau. The plan recognises the significant activity that already exists to prevent and manage diabetes in Counties Manukau, and creates a long-term vision to align existing activity and a context for new investment, based on evidence and best practice. Fundamental to the plan is its "whole society, whole life course, whole family/whanau" approach to preventing and managing diabetes.

The **LBD Operational Plan 2005/2006** outlines the interventions/initiatives that will be implemented over 2005/2006 as part of the process to meeting the long-term outcomes identified in *LBD: A Five Year Plan*.

Both plans are the result of an extensive 15 month consultation and development process.
